

## How to add a child to a parent's account

Under the new SSO registration process, children under 16 will not have their own login. A child's record is now linked to the parent's account.

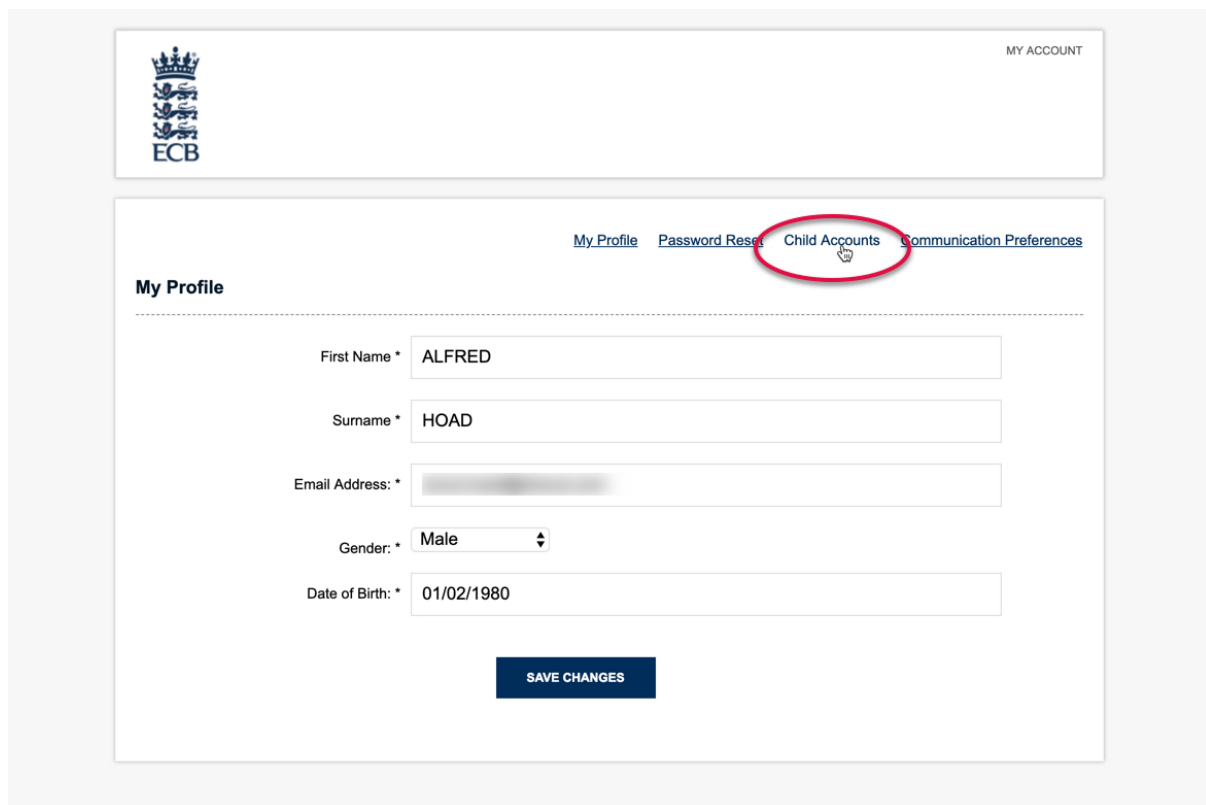

The parent must log in to <https://www.play-cricket.com/> using the credentials that were created for their own account. Click on the name of the account and select Edit Account from the drop-down list.

Click on the Edit ECB Login Details button
